

## "HONESTY THE BEST POLICY."

The subscribers have just returned from New York and Boston, with a well-assorted assortment of Goods, adapted to the wants of this market, which we intend to sell as low as at any establishment in this village. We have bought our goods at fair rates in market, and intend to sell them at such prices as will cover our cost, plus a small profit, in compensation of our goods and prices. Be not deceived in the fact that some times it is said that people are selling off at cost—at least when auction prices are low, trade where you can get your money's worth.
